ISSUED IN REFERENCE TO SECTION 14 OF THE RULE 8.86.301

PUBLISHED: October 5, 1990  
EFFECTIVE: November 1, 1990  
12:01 a.m.

Due to the latest data available as of October 5, 1990 as applied to the Distributor Formula (Docket #89-88, first price announcement effective 3/1/89) and the Producer Formula (Docket #69-84, first price announcement effective 7/1/84) the Producer Formula Index has been calculated to be 266.27. The Distributor Index has been calculated to be 289.44.

The following prices at the producer, on-the-farm wholesale and retail, institutional, jobber wholesale and retail and warehouse levels have been determined from the following indexes. On-the-farm prices are applicable to only those producer-distributors whose milk is both produced and sold on-the-farm.

Re: Correction to Class II and III Producer Price

PLEASE RETURN

Please be advised the class II and III producer price was calculated in error when the freight cost of \$0.0125 per pound was inadvertently left out when calculating the average wholesale selling price of dry milk solids for the Central State area.

The class II price which was announced on December 10, 1987 as \$11.04, should have been announced as \$11.13 and the class III price which was announced as \$9.37 should have been announced as \$9.45.

This class II and III price announcement will replace and supersede the prices which were announced on December 4, 1987.

If you have any questions concerning the change, please call or write this office.
